

Jewelry Inventory Procedures

POSITION Shipboard Shop Seller, Assistant Managers, Managers

PRIMARY RESPONSIBILITIES:

The Shop Employees will provide integrity and honesty and be accountable for all Shrinkage Control Programs for all merchandise categories onboard and specifically in the Fine Jewelry/Fine Watches department.

Shop Employees involved with the Jewelry Department will:

A. implement the current Jewellery inventory procedure according the Jewellery need, also adding Damage Procedure

1. Every cruise, the jewellery specialist is responsible for completing a full piece count inventory of the jewellery shop, using Perpetual Inventory File and procedures currently in place.
2. The shop manager must counter-sign this inventory to verify the accuracy.
3. The Fleet Supervisor will be involved into the fully Jewellery inventory procedure with their checking that point 1 and 2 have been conducted as per standards, and then they will sign-off each inventory on every visit on-board
4. All Damages B&S Jewellery must be kept aside, with clearly identified list, and available for controls by FSP / Office corporate. All Damages B&S Jewellery must be reported to office immediately, using "B&S Avaria" template.

B. Be involved by the Fleet Supervisor in the operational piece count during his/her visit on board

1. At a time specified by the Geneva office, the FSP must conduct together with Shop employees, a full jewellery inventory (Piece count) to a specified brand in line with instructions given by Jewellery category manager with immediate notice
2. The FSP must report immediately back to the Jewellery category manager with the result. Jewellery Manager would advise further executions (ie: recount, sku check, etc..)

C. Apply correctly to inventory procedure during the handover between shop managers and jewellery specialists

1. Jewellery shop inventory, by Sku, must be completed and sent to office no later than 72 hours before manager disembarkation, and then signed off by the office no later than 48 hours before disembarkation.
2. No Shop sellers nor Managers can disembark if the handover has not been completed as per standard procedures above.

D. Be liable to immediate corrective actions if the loss is above tolerance rate

1. Above tolerance level, the on-board ship command must be informed as soon as there is a loss before the shop manager disembarkation in order to execute cabin inspection and locker searches

E. Be involve the Fleet Supervisor in the quality items check

1. Jewelry Category Manager will receive an immediate feedback from FSP to the jewellery team on discovery of sub-quality, damaged or broken items.

F. Be liable to immediate corrective action if items have been damaged by the team

1. Office will communicate corrective actions accordingly

G. Be liable for correctives actions which may lead up to dismissal in case of Jewellery stock loss (starting from 1 or more products)

1. Office will communicate corrective actions accordingly
